News Briefs

The Hitchcock Lectures will be delivered at UCSF and Berkeley by Nobel Laureate, Professor Francois Jacob. The lectures are titled "Of Mice and Martians," and will explore Jacob's research with cancer cells. The UCSF lecture "Mouse Teratocarcinoma and Embryonic Development" will be given in Cole Hall, 3:30 p.m., Tuesday, February 22. Dr. Jacob, head of the Department of Molecular Genetics in the College de France, is most noted for his research in molecular genetics. He provided one of the major concepts for understanding cell function, in the operon theory of the regulation of gene expression, and thus introduced the idea of messenger RNA. Jacob also demonstrated that bacteria carry the genome of viruses in their own chromosome in the form of proviruses and discovered that in sexual conjugation of bacteria there occurs a gradual transfer of the chromosome of a male donor bacterium to the female recipient cell.

The Department of Health, Education, and Welfare has appointed Edgar R. Arriola, a third year student in the UCSF School of Pharmacy, to serve on the National Advisory Council on Health Professions Education of HEW for a term of one year. Arriola was one of two full-time students selected from health professional schools throughout the United States. The Advisory Council was established in 1971 and is to advise the Secretary . . . with respect to policy matters in the administration of programs of financial assistance for the health professions, including construction of facilities, student loans and scholarships, capitation for the support of educational programs, special projects and other purposes to improve the quality of education.

Book of the Year in Pediatric Nursing as designated by the American Journal of Nursing is *Nursing Care of Children.* The text was written and edited by Eugenia Waechter, Associate Professor, Department of Family Health Care Nursing with collaboration in preparing the medical portion of the text by Jane Lipp, Assistant Clinical Professor Pediatrics, and Lecturer in FHCN. The revised edition (9th edition, Phila.; J.B. Lippincott, 1976) includes a new chapter, "Role of the Nurse in Primary Health Care of Children," written by Barbara Durand, Associate Clinical Professor, Nursing and Doris Dunbar, Associate Clinical Professor, FHCN. Numerous other faculty members at UCSF contributed to preparation of the text.

Copies of three audiovisual programs have been donated to CORT by Dr. and Mrs. Marion B. Sulzberger and the Institute for Dermatologic Communication and Education. The programs are: "Tumors of the Skin, Malignant or Benign?" Parts One and Two, for an audience of dermatologists and residents in dermatology, other physicians, medical students and allied health professionals; and "Everybody's Skin vs. Athlete's Foot," for adolescent and older audiences. These are now available for use by campus faculty and students in SIMA, CORT's Self-Instructional Media Area, located in room 345 HSE.

The Human Sexuality Program has a grant from NIMH to train disabled and able-bodied persons, having significant contact with the disabled, as sex counselors for disabled persons. Trainees receive supervised instruction and experience in providing appropriate socio-sexual information and counseling for persons with physical disabilities, their families and intimates, and personnel of habilitation and rehabilitation agencies. For further information contact David G. Bullard, Coordinator, Sex and Disability Training Project, Human Sexuality Program, x1067.

The Bay Area Community College Television Consortium offers college credit for courses by television. Current offerings are "Classic Theatre," "Clothing Construction," "History of Art," and "Introduction to Business." Courses will be televised beginning in February. There is no tuition charge or registration fee for viewers who have been residents of California for one year prior to enrollment, but there is a charge for textbooks. For information or enrollment call City College of San Francisco, 239-3581.

Efforts to expand the Campus recycling program have begun with Assistant Vice Chancellor Robert Cannon serving as the coordinator. White ledger paper is the immediate target for further campus recycling efforts. Arrangements may be made with the Campus recycling vendor, Don Neel, to pick up accumulated computer paper, computer cards, or white ledger paper. Any office may participate in either of two plans: Plan A — Funds which accrue will be credited to the general Campus recycling fund to be used for periodic recycling needs, such as the purchase of equipment as required. Contact Don Neel, 957-9610 if interested. Plan B — Those departments with accumulation of at least 500 lbs. (10 cartons) of paper may have the revenue from their recycled material credited back to their departmental budget. Write Robert Cannon's office, 1379 3rd Ave. if interested.

The Psychotherapy Evaluation and Study Center, Stress Research Unit, LPNI is offering short-term psychotherapy to adults who have within the past year experienced a traumatic life event, such as accidents, surgery, violence, divorce, or death of a loved one. The therapy is offered in conjunction with the Unit's research on the psychological response to traumatic or stressful life events, and will involve tape-recorded interviews and completion of occasional rating scales, kept anonymous and reviewed only for the Center's research and training purposes. For further information call x7512 or x7510.

SFGH Briefs

The first in a series of videotapes for non-English speaking women, produced by the Self-Health Project, SFGH Women's Clinic, is now available for community viewing. The 15-minute Cantonese language presentation, "Becoming A Mother", was taped in Chinatown and at the SFGH Medical Center. Featuring an all-Chinese cast, it discusses prenatal and postnatal health care and community health services available to Cantonese-speaking women recently arrived in this country. A similar videotape for Spanish-speaking women is nearly completed. The Self-Health Project is funded under a San Francisco Foundation grant, and is under medical supervision of the UCSF Obstetrics and Gynecology Service at SFGH. For further information call Terry Looper, Coordinator at 565-8166.

New developments in protein-sparing therapy will be discussed by a distinguished visitor, George L. Blackburn, Associate Projessor of Surgery, Harvard Medical School. He will speak at SFGH Trauma Conference, Thursday, February 24, at 8:30 a.m. in the Surgical Amphitheater, Building 1. Dr. Blackburn, who is widely known for his research, is also Chief of Nutrition and of the Metabolic Laboratory, New England Deaconess Hospital, Boston.

Deadline for the next issue of **Today/Tomorrow** which will cover the events from Feb. 26-March 11 will be Tuesday, Feb. 15, 11 a.m. Please send your copy to Allen Balderson, News Services Department, 1475 4th Ave.
